Ayush Gupta

Software Developer | Artificial Intelligence Engineer
Greater Noida, UP | +91-8433287568 | ayushgupta.stack@gmail.com
LinkedIn | GitHub | Codolio

Summary

Third-year B.Tech CSE (AI) student who builds Python backends, database-driven web applications and local-LLM tools. Comfortable with SQL, HTML and REST APIs, and looking for a software development internship to ship clean, well-documented features and contribute to AI-driven solutions.

Education

Galgotias University, Greater Noida 2028
B.Tech in Computer Science & Engineering (Artificial Intelligence) **CGPA: 9.42**

Taxsila Public School, Meerut
Class XII (CBSE), 2024 **90%**
Class X (CBSE), 2022 **91%**

Skills

Programming Languages: Python, Java, C
Databases: MySQL, PostgreSQL (Supabase), SQL, Firebase
Web Technologies: HTML, CSS, JavaScript, TypeScript, React
Backend Development: FastAPI, Django, Node.js, REST APIs
AI / Machine Learning: Hugging Face, Ollama (Local LLMs), LangChain, RAG, EasyOCR, NumPy, Pandas, Matplotlib, Pydantic
Deployment & Tools: Git, GitHub, Docker, Render, Vercel
CS Fundamentals: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

Experience

AI Intern | *inAmigos Foundation* Aug 2026 – Sep 2026

- Completed a 2-month upskilling program in prompt engineering, applying 5+ techniques (zero-shot, few-shot, chain-of-thought, role-based, iterative refinement) to optimize LLM outputs.
- Leveraged 4+ AI-assisted design tools to generate website layouts and UI/UX prototypes, speeding up concept-to-mockup turnaround.
- Delivered 3 end-to-end website UI/UX designs by pairing AI-generated wireframes with manual refinement across 2+ feedback cycles per project.

Projects

Prakarti Report – AI Environmental Pollution Reporting Platform | GitHub Sep 2026
Python, FastAPI, Gemini API, Supabase (PostgreSQL), React, TypeScript, JavaScript, HTML, CSS, Leaflet

- Created a FastAPI pollution-detection service powered by Gemini vision that validates JPG/PNG/WEBP uploads (10 MB cap) and returns structured JSON across 9 pollution categories with confidence and evidence.
- Architected the Supabase (PostgreSQL) backend with 8 migrations, 10 Row Level Security policies and realtime subscriptions that keep reports and organisation boards in sync.
- Developed a React/TypeScript citizen app plus an 11-page HTML/CSS/JavaScript officer dashboard featuring a Leaflet hotspot map with 4 filters (severity, status, city, date).

Nova OS (Gori OS) – Voice-Enabled Windows AI Bridge | GitHub Sep 2026 – Oct 2026
Python, FastAPI, WebSockets, Groq, AssemblyAI, Flutter, Vercel, Render

- Engineered a FastAPI bridge hosting a browser-based desktop of 6 apps, controlled from a Flutter Android client over HTTP and WebSocket.
- Designed a Groq voice pipeline that maps speech to a 38-endpoint registry through an 11-step flow with pre-flight validation.
- Secured access with 6-digit PIN pairing (5-minute expiry), bearer tokens and 60-second single-use speech tokens; deployed on Vercel and Render.

Certifications

- **Mastering MySQL** – GUVI
- **SQL Database Certification** – Oracle
- **Google Development Workshop** – Firebase, MediaPipe, Antigravity

Achievements

- **AI Summit 2026** – Finalist (out of 40,000 teams)
- **360**+ problems solved on Codolio
